

# POWERING REALISTIC MOTION SYSTEMS AND HIGH-FIDELITY GRAPHICS FOR THE WORLD'S LEADING T&S OEMS.

---

DC Platforms™ power this premium simulator that includes a full cabin on a robust 3 DOF (degrees of freedom) motion base. Designed for high-level simulation training with authentic controls and VR functionality.

---

As a leading supplier to many of the top Training & Simulation equipment manufacturers, DC brings the industry credibility and global logistics experience needed to win over the competition.

This customer provides state-of-the-art simulator systems for the port, construction, and military markets. They build simulators that are designed to train equipment operators on equipment familiarization and safety awareness.

TECHNOLOGY USE CASE: A8320 / Image Generation / 2U Server / Long Lifecycle and active Lifecycle Management

- Chassis, 2U Rackmount
- Motherboard
- Processor / Intel Xeon
- Memory, 32GB
- Storage, 500GB, SSD
- NVIDIA GeForce RTX
- Custom Packaging
